

PurAir 200 Filter Maintenance Guide

1

Check the indicator light (red circle) on the panel to determine whether the carbon filter need to be replaced or not.

2

Put your finger at the lower corner of the front cover. Gently pull the front cover. At the same time , PurAir 200 will switch off automatically for safety purposes.

3

Lift the front cover to remove it completely.

4

You can see the filters behind the front cover.

5

Slot in your fingers to the "hole" and lift the filters with your fingers.

6

Now , you will see there are 3 filters all together : Prefilter , carbon filter & HEPA filter.

7

Remove the string tie of the prefilter to dismantle the filter pack.

8

Prefilter :
Check the prefilter to see if it is in good condition. If the prefilter is dirty , wash the prefilter with water and dry the filter. It is recommended to wash the prefilter once every 500 hours.

9

Carbon Filter :
Check the carbon filter's condition. It is recommended to replace the carbon filter after 1500 hours.

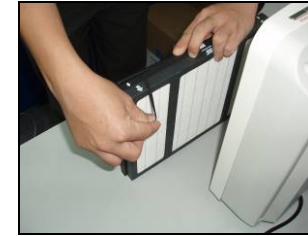

10

HEPA Filter :
Check the HEPA filter base on the sticker on the filter frame (red circle). The colour contour on the sticker indicates the "dirtiness" level of the filter. It is recommended to replace the HEPA when it reaches "black" level.

11

After maintenance , check the arrow on the filter base. The arrow indicates the airflow direction of the filter. Make sure the airflow direction is correct to maximize the filter lifespan. The arrow shall be pointing

12

Tie up all the filters with the string tie of the prefilter according to the following sequence : Prefilter → Carbon Filter → HEPA Filter

13

Slot in the filters and make sure the filters are in proper position.

14

The brackets (left side & right side) of the front cover shall be placed in correct position.

15

Press the lower corner of front cover gently to close the cover.

16

Press the "Reset" button on the remote control to reset the filter replacement (carbon filter) indicator. This is only necessary if you have replaced the carbon filter. After all , the filter replacement job is done!
